

ARKIVE LABS BRAND GUIDELINES

INTRODUCTION

Welcome to the Arkive Labs Brand Guidelines, a comprehensive framework for representing our brand identity with consistency, clarity, and purpose. These guidelines ensure coherence across all brand touchpoints, enabling us to communicate our values, personality, and unique offerings to every audience we serve.

Our brand guidelines empower us to connect with our audience, establish a strong presence, and tell our unique story. By maintaining consistency and adhering to these guidelines, we cultivate trust, showcase our work, and build loyalty that lasts. Let these guidelines be our compass as we build and grow, leaving a lasting impact on the people we serve.

Arkive Labs is the AI-powered marketing and technology agency built for creators, founders, and brands that refuse to play small. One team. Every channel. No limits.

OUR AIM

To close the gap between intention and execution. We exist to give businesses of every size, from solo creators to growing startups, the tools, strategy, and execution power that was once only available to the biggest agencies. Every deliverable we produce should be something you are proud to put your name on.

OUR VISION

A Sri Lanka where ambition is no longer limited by resources. We believe that a single founder with the right tools should be able to compete with and beat agencies ten times their size. Arkive Labs exists to make that possible, and to prove that excellence, integrity, and efficiency are not in conflict.

BRAND VALUES

Integrity	We do not cut corners, chase trends, or say yes to things we cannot deliver. Everything we build, write, or recommend is something we would stand behind publicly. Honesty is not a policy. It is the reason clients trust us and keep coming back.
Efficiency	Time is the one resource neither we nor our clients can recover. We obsess over systems, tools, and processes that let us do more with less. Not to be cheap, but because speed and precision, when combined, are a competitive advantage that compounds. We charge fairly for real work, not for hours wasted.
Elevation	We are not here to do the work for people. We are here to raise the ceiling on what they can achieve themselves. Every campaign, every strategy, every deliverable should leave the client more capable and more confident than before we arrived.
Service	We build for more than profit. From day one, Arkive Labs has been committed to creating real opportunities, investing in youth, training the next generation of creators and technologists, and giving back in ways that matter to the communities we come from.

TONE OF VOICE

Direct	We say what we mean and we get to the point. Our audience is busy, ambitious, and sharp. They do not have time for waffle and neither do we. Every sentence we write should earn its place. If it does not add something, it does not go out.
---------------	---

Ambitious	We think big and we are not shy about it. Arkive Labs is built for people who want more: more output, more reach, more impact. Our voice reflects that energy. We talk about possibility with conviction, not hype. Big claims, real delivery.
------------------	--

Grounded	For all the ambition, we stay real. We are two founders who built this because we felt the same frustration our users feel. That comes through in how we communicate: honest, self-aware, and never too polished to be human. People trust us because we sound like people, not a corporate machine.
-----------------	--

Empowering	Everything we say is in service of making the person reading it feel more capable. We do not talk down, we do not gatekeep, and we do not make marketing feel more complicated than it needs to be. The goal is always the same: someone reads our words and feels ready to go and do something with them.
-------------------	--

ABOUT US

Arkive Labs was founded by two people who came from humble backgrounds, worked their way through marketing and technology the hard way, and decided there had to be a better way to build. We are not a corporate machine. We are two builders who believe that doing great work and doing right by people are not competing ideas. They are the same idea.

Akesh Chandrasiri

Co-Founder Client Communication, Partnerships, AI Engineering & Compliance

Akesh is a cybersecurity graduate whose career spans client communications, partnerships, AI engineering, and compliance consulting. He is the architect of Arkive's proprietary tooling, systems built to accelerate marketing output and reduce execution time without sacrificing quality. At Arkive, he leads strategy, client relationships, and everything that connects the work to the world.

Yohan Wickramasinghe

Co-Founder Creative Direction, Graphic Design & Content Strategy

Yohan is a software engineering undergraduate and the creative engine behind Arkive Labs. He handles all visual identity, content strategy, and creative design, the face and feel of everything the agency produces. His work translates ideas into assets that command attention, and his eye for design ensures that every client deliverable is something worth putting a name on.

Built on faith.
Driven by purpose.
Measured by impact.

The name Arkive is not accidental. It draws from the story of Noah's Ark, a call to build with purpose, preserve what matters, and move forward with conviction regardless of the odds. That is the spirit we bring to every client, every project, and every hire.

LOGO DESIGN

- 2.1 Logomark
- 2.2 Logotype
- 2.3 Lockup
- 2.4 Clear space
- 2.5 Minimum sizes
- 2.6 Common mistakes

LOGOMARK

The logomark is the standalone icon: the sail, mast, and hull sweep that form both an abstract ark and the letter A. It is the most distilled expression of the Arkive Labs brand and carries the full weight of the identity on its own.

The logomark is used in contexts where space is limited or where the brand is already established, such as app icons, favicons, social media profile images, and embossed or engraved applications. It should never be stretched, redrawn, or reconstructed. Always use the approved artwork files.

LOGOTYPE

The logotype is the wordmark on its own: ARKIVE set in a bold, wide-spaced sans-serif with LABS sitting beneath it in a lighter weight and wider tracking. The relationship between the two words is intentional. ARKIVE commands attention while LABS qualifies and grounds it.

The logotype may be used independently in contexts where the icon is not required, such as document headers, email signatures, or co-branded applications where the logomark would compete visually with other elements.

The image shows the ARKIVE LABS logotype. The word "ARKIVE" is in a large, bold, wide-spaced sans-serif font. Below it, the word "LABS" is in a smaller, lighter weight, wide-spaced sans-serif font. The two words are centered and stacked vertically.

LABS

LOGO LOCKUP

The logo lockup is the primary brand mark: the logomark and logotype combined as a single unit, with the icon sitting to the left of the stacked wordmark. This is the default version of the logo and should be used in the majority of applications including website headers, marketing materials, presentations, merchandise, and signage.

The proportional relationship between the icon and the wordmark is fixed. Never rearrange the elements, change the spacing, or use the lockup at a size where either element becomes illegible.

CLEAR SPACE

Clear space is the minimum breathing room that must be maintained around the logo at all times. No text, imagery, graphic elements, or other logos should enter this zone. The required clear space on all sides is equal to the height of the letter A in the logotype. This ensures the logo retains its visual impact and is never crowded or compromised by surrounding content, regardless of the application or format.

MINIMUM SIZES

To protect legibility, the logo lockup should never be reproduced smaller than 120px wide in digital applications or 35mm wide in print. Below these sizes the fine strokes of the logomark and the spacing of the logotype begin to break down and the mark loses its integrity. At small sizes where the lockup would fall below the minimum, the standalone logomark should be used instead. The logomark itself should never appear smaller than 50px in digital or .75" in print.

PLACEMENT

The Arkive Labs logo should always be placed with intention and authority. On digital interfaces, the preferred position is the top left of the viewport, following natural reading patterns and establishing brand presence immediately.

On print and marketing materials, the logo sits either top left or centred depending on the layout, but should always occupy a position of visual prominence.

The logo must only appear in its approved colour versions: white on dark backgrounds, black on light backgrounds. It should never be placed on busy imagery, low-contrast backgrounds, or colours that reduce its legibility.

COLORS

- 3.1 Color pallet
- 3.2 Combinations
- 3.3 Shades

COMBINATONS

The consistent use of color is vital to effective brand recognition. Our brand should always be represented in one of the colors on this page, aside from specific recommendations within this guide.

TYPOGRAPHY

- 4.1 Typeface
- 4.2 Weights
- 4.3 Type Scaling
- 4.4 Common mistakes

TYPEFACE

This versatile and free-for-commercial-use font lends a contemporary edge to the brand's visual communication, ensuring consistency and legibility across various platforms and materials.
