

ARKIVE LABS

AI Context Document

For use with Claude Code, Claude Design, and AI agents

WHAT THIS DOCUMENT COVERS

- 01 Who we are and how we think
- 02 Brand identity: colors, type, voice
- 03 What we build and for whom
- 04 Technical stack and preferences
- 05 Output standards and quality bar
- 06 How to work with us efficiently

WHO WE ARE

Arkive Labs is an AI-powered marketing and technology agency founded in Sri Lanka by Akesh Chandrasiri and Yohan Wickramasinghe. We build marketing strategy, content, design, and technical systems for creators, founders, and growing brands.

We are not a large agency. We are two founders with a sharp set of skills, proprietary AI tooling, and a commitment to doing excellent work at a fair price. Everything we produce should look and feel like it came from a team ten times our size.

CO-FOUNDER

Akesh Chandrasiri

Cybersecurity graduate. Client communication, partnerships, AI engineering, vibe coding, and compliance consulting. Leads strategy, client relationships, and internal tooling development.

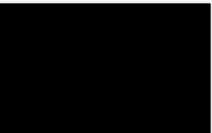

CO-FOUNDER

Yohan Wickramasinghe

Software engineering undergraduate. Content writing, graphic design, creative direction, and vibe coding. Leads all visual identity and creative output.

ORIGIN
The name Arkive draws from the story of Noah's Ark: a call to build with purpose, preserve what matters, and move forward with conviction regardless of the odds. That is the spirit behind everything we do.

BRAND IDENTITY

Black
#000000
Primary / Dark BG

White
#FFFFFF
Primary / Light BG

Slate
#B0BCD4
Secondary Accent

Gold
#C8B87A
Highlight Accent

Logo: white on dark backgrounds, black on light. Never on busy imagery or low-contrast surfaces.

TYPOGRAPHY

Montserrat

Primary typeface across all touchpoints. Free for commercial use.

Regular

Body copy, captions

Medium

UI labels, meta

SemiBold

Sub-headings

Bold

Section headings

ExtraBold

Display / hero text

TYPE SCALE

H1

64px

H2

48px

H3

36px

H4

24px

Body

14px

Caption

11px

LOGO RULES

- Minimum size: 120px wide (digital) / 35mm (print).
- Clear space: equal to the height of the A in the logotype on all sides.
- Never stretch, recolor, rotate, or add effects to the logo.
- Use lockup (icon + wordmark) as default. Icon alone for small/square contexts.

VOICE, VALUES & TONE

CORE VALUES

Integrity
We say what we mean. No overselling, no shortcuts.

Efficiency
Respect time. Ours and the client's. Always.

Elevation
Every output should raise the client's ceiling.

Service
We build for impact, not just revenue.

TONE OF VOICE

Direct
Get to the point. No waffle. Every sentence earns its place.

Ambitious
We think big. Talk about possibility with conviction, not hype.

Grounded
Honest and self-aware. Sound like people, not a corporate machine.

Empowering
Make the reader feel more capable. Never talk down or gatekeep.

WRITING RULES FOR AI OUTPUT

No em dashes
Use commas, periods, or restructure the sentence instead.

No excessive bold
Bold is for headings and value names. Not for emphasis mid-sentence.

No squeezing type
Never condense or horizontally scale the typeface.

No centre alignment
Body text is always left-aligned. Centre only for rare exceptions.

No shadows on text
Typography should be clean. No drop shadows or glow effects.

Sentence case copy
Headlines in ALL CAPS via the style. Body text in sentence case.

WHAT WE BUILD

SERVICE AREAS

Marketing Strategy

- Campaign planning
- Content calendars
- Channel strategy
- Performance analysis

Content Creation

- Copywriting
- Social media content
- Email sequences
- Ad creative briefs

Design & Visual

- Brand identity
- Social graphics
- Marketing collateral
- UI mockups

AI & Automation

- Custom AI tooling
- Workflow automation
- Prompt engineering
- Process optimisation

Tech & Development

- Web builds
- Landing pages
- Vibe coding
- Tool integrations

Compliance & Ops

- Cybersecurity advisory
- Data compliance
- Process documentation
- Partnerships

TARGET CLIENTS

- **Solopreneurs & Creators**
People building a personal brand or one-person business who need agency-grade output.
- **Early-stage Startups**
Founders who need marketing and brand infrastructure built fast without big agency costs.
- **SMEs in Sri Lanka**
Established small businesses expanding their digital presence and marketing capability.
- **Regional Brands**
Companies in South and Southeast Asia looking for culturally aware, modern marketing.

TECHNICAL CONTEXT

PREFERRED STACK & TOOLS

FRONTEND

- React / Next.js
- Tailwind CSS
- HTML / CSS / Vanilla JS

DESIGN

- Figma
- Adobe Suite
- Canva (client-facing)
- Midjourney

BACKEND

- Python
- Node.js
- Supabase
- Firebase

MARKETING

- Meta Ads Manager
- Google Ads
- Mailchimp / Klaviyo
- Buffer / Later

AI / ML

- Anthropic Claude API
- OpenAI API
- Custom prompt chains
- LangChain

OPS

- Notion
- Slack
- Zapier
- Make (Integromat)

OUTPUT STANDARDS

Production-ready

All code should be deployable as-is. No placeholder logic, no TODO comments left in.

Commented clearly

Comment the why, not the what. Assume a junior dev will maintain this.

Mobile-first

All UI work starts from mobile viewport and scales up. Never the reverse.

Accessible

WCAG AA minimum. Semantic HTML, proper contrast ratios, keyboard navigable.

No generic AI look

Avoid purple gradients, Inter font, and cookie-cutter layouts. Every design is specific.

Brand-consistent

Always apply Montserrat, the Arkive color palette, and left-aligned body text.

HOW TO WORK WITH US

FOR AI AGENTS: START OF SESSION PROTOCOL

- 01

Read this document first

Before generating anything, read the full AI Context Document. Brand colors, typography, tone, and quality standards all apply to every output.
- 02

Confirm the task scope

Identify: what is being built, who it is for, and what channel or format it will appear in. If any of these are unclear, ask before starting.
- 03

Apply brand by default

Always use Montserrat. Always use the Arkive color palette. Always left-align body text. Never use em dashes. These are not optional.
- 04

Production quality only

Do not submit work that is 80 percent done. Every output should be ready to send to a client or deploy to production without additional cleanup.
- 05

Flag, do not guess

If a requirement is ambiguous, say so before building. A wrong assumption costs more time than a clarifying question.
- Why this document exists**

Every minute spent clarifying brand basics is a minute not spent building. This document eliminates that friction. Upload it once, reference it every session, and go straight to work.

QUICK REFERENCE

The essentials on one page. Refer here when you need a fast check.

BRAND

Name	Arkive Labs
Type	AI Marketing & Tech Agency
Location	Sri Lanka
Founded	Akesh Chandrasiri + Yohan Wickramasinghe
Tagline	One team. Every channel. No limits.

COLORS

	Black	#000000
	White	#FFFFFF
	Slate	#B0BCD4
	Gold	#C8B87A

TYPOGRAPHY

Font	Montserrat (all weights)
H1	64px ExtraBold, ALL CAPS
H2	48px ExtraBold, ALL CAPS
H3	36px Bold
Body	14px Regular, left-aligned
Caption	11px Regular
Line ht.	1.55-1.6x font size

tone

Direct	Get to the point.
Ambitious	Think big, speak with conviction.
Grounded	Honest, human, self-aware.
Empowering	Make readers feel capable.

ALWAYS

- + Use Montserrat
- + Apply the Arkive palette
- + Left-align body text
- + Mobile-first for all UI
- + Production-ready output
- + Accessible markup (WCAG AA)
- + Comment the why in code
- + Flag ambiguity before building

NEVER

- ✗ Use em dashes
- ✗ Centre-align body copy
- ✗ Stretch or recolor the logo
- ✗ Use purple gradients or Inter
- ✗ Add text shadows
- ✗ Leave placeholder code
- ✗ Guess on ambiguous briefs
- ✗ Deliver 80% done work
